

GORAN LONCAR

Full Stack Developer

- +381621468911
- gloncarfl@gmail.com
- <https://github.com/codingexpert1995>
- Braće Škerovića 18, 11147 Belgrade, Serbia

EDUCATION

Bachelor of Computer Science

University – Nikola Tesla

2011 – 2015

- Specialized in software engineering, database systems, and web technologies.
- Completed thesis on scalable API design and cloud integration.

EXPERTISE

Backend Development

Database Management

Graphic Design

CLOUD & DEVOPS

Testing & Code Quality

Performance Optimization

Agile Collaboration

UI/UX Collaboration

Version Control & GitOps

CERTIFICATIONS

- JavaScript Algorithms & Data Structures – freeCodeCamp (2020)
- Certified Laravel Developer (2021)
- Meta React Developer Certification (2021)
- AWS Certified Developer – Associate (2022–2025)

ABOUT ME

Highly skilled Senior Full Stack Developer with over 8 years of experience creating innovative web applications. Proficient in both front-end and back-end technologies, with a strong ability to architect scalable and maintainable systems. Adept at collaborating with cross-functional teams, managing projects from conception to completion, and delivering high-quality solutions that meet client needs. Excellent problem-solving skills and a passion for staying up-to-date with the latest industry trends and technologies. Committed to driving continuous improvement and exceeding project goals.

WORK EXPERIENCE

Senior Backend Developer

2022 – 2025

StuntCoders

- Designed and maintained scalable backend systems and RESTful APIs for e-commerce and SaaS products.
- Worked with Laravel, Node.js, MySQL/PostgreSQL, Redis, and Docker to build secure, high-performance applications.
- Integrated third-party APIs (payment gateways, CRMs, and ERP systems) and optimized database queries for speed.
- Led backend architecture decisions, code reviews, and mentoring of junior developers.
- Automated CI/CD pipelines, reducing deployment time and improving release reliability.
- Collaborated closely with frontend and DevOps teams to ensure smooth delivery of full-stack projects.

Lead Software Engineer

2020 – 2022

Lanaco

- Lead backend and full-stack teams in building enterprise-grade software for telecom, finance, and government sectors.
- Architect scalable microservices and REST APIs using Java/Spring, .NET Core, Node.js, and modern DevOps tools.
- Oversee code quality, mentor developers, and drive CI/CD automation for faster, more reliable deployments.
- Collaborate with stakeholders to translate complex business needs into secure, high-performance solutions.
- Improved system scalability and reduced downtime through optimized architecture and monitoring pipelines.

Full Stack Developer

2016 – 2020

Lanaco

- Developed and maintained full-stack web applications using React, Node.js, and Laravel with PostgreSQL/MySQL databases.
- Built responsive user interfaces and RESTful APIs for enterprise clients across telecom and finance sectors.
- Integrated third-party services (payment gateways, CRM, ERP) and optimized backend performance.
- Collaborated with UX/UI, QA, and DevOps teams to ensure smooth project delivery and high code quality.
- Contributed to CI/CD pipelines and cloud deployments, improving delivery speed and reliability.
